

COMPANY PROFILE

Federal APD, Inc.: Manufacturer of Advanced Parking, Access and Revenue Control Systems

Federal APD, Inc., a division of the Federal Signal Technologies Group, is the largest U.S. manufacturer of parking, access and revenue control systems. Our regional offices serve an extensive network of global distributors by offering leading-edge technology and innovative system solutions delivered with a commitment to long-term customer support. Our product line consists of fully integrated lane devices with accompanying facility management software packages configurable to meet the needs of each customer.

The company manufactures a wide range of products, including: ticket dispensers, barrier gates, count control systems, vehicle recognition systems, card access readers, Automated Vehicle Identification (AVI), Automated License Plate Recognition (LPR), manual and automated fee computers to collect parking revenues and central management system software to program, track and report on all the activities in a parking facility.

Federal APD's incredibly flexible systems are the industry standard for function, simplified configuration, and expandability. Our products provide an unsurpassed levels of management control, and unlimited expansion to grow that makes it ideal for the various markets we serve: Stadiums, Colleges & Universities, Airports, Municipalities, Hospitals and Shopping Malls. Federal APD takes pride in offering the finest products available and supporting those products with immediate delivery, complete project management, guaranteed product reliability, documentation, and service; everything needed to make an installation efficient and trouble-free.

Federal APD has achieved sales leadership in its marketplace by satisfying customers with well-built and innovative products since 1953. The company has hundreds of qualified distributor that have received comprehensive training programs that provide extensive product knowledge and service techniques.

Federal APD is a wholly owned subsidiary of Federal Signal Corporation. Established in 1901, Federal Signal has become one of the 1000 largest Corporations in the United States and is listed on the New York Stock Exchange (NYSE:FSS). The company is managed on a decentralized basis and is comprised of four major operating groups: Safety and Security Systems, Environmental Solutions, Fire Rescue and Federal Signal Technologies.

At Federal APD, thirty years ago we pioneered the system that made the variable-rate "self-park" facility possible. This created an industry, and led to innovations ranging from the first intelligent barrier gates all the way to today's sophisticated facility management software. Today, Federal APD continues to supply the imaginative technology and comprehensive service that enables parking facilities to meet all their business objectives.
